

Universal Standoff

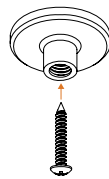

Installation Instructions

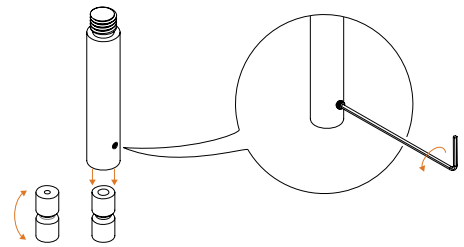

1 Determine fixture layout and mark hole location on mounting surface (recommended 3 mounts per 2 meters of channel).

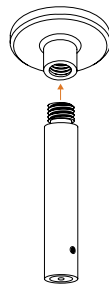

2 Mount suspension discs with #8 mounting screws onto mounting surface.

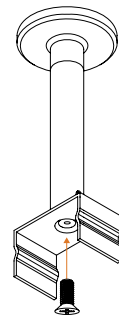

3 (Optional) Loosen set screw to remove and flip adapter for mounting with M5 screw.

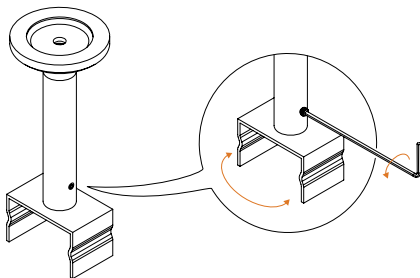

4 Thread standoff into suspension disc.

5 Secure channel (or mounting clips) to standoff adapter with either M5 or #4-40 screw.

6 Loosen set screw to adjust the rotation of the channel (or mounting clip).

7 Tighten set screw to finish installation.
